

California OES Weather Threat Briefing

January 29, 2019
9:00 AM PST

Day 1: No significant weather is expected.

National Weather Service
*Western Region Headquarters
Regional Operations Center
Salt Lake City, UT*

Key Points

01/29/19 - 02/04/19

Tuesday-Wednesday

- No significant weather impacts are expected across California.
- Light precipitation is possible both days.

Wednesday night-Thursday

- The first in a series of storm systems will likely bring a quick shot of rain to central and southern California.
- There is a slight chance of thunderstorms across southern California on Thursday afternoon.

Friday-Monday

- A much larger storm system will bring widespread valley rain and mountain snow to the state. Confidence in details is still low, but flash flooding and mountain snowfall travel impacts are both possible.
- Saturday will likely be the day with the heaviest precipitation, with widespread precipitation potentially continuing Sunday. Showers may linger as late as Monday in some locations.
